KISHORE S S

Data Engineer · AWS · PySpark · SQL · Java / Spring Boot

PROFILE

Data Engineer with 2+ years at Accenture building end-to-end data pipelines and automated reporting on AWS (Glue, Athena, Step Functions, Lambda, S3) with PySpark and SQL. Started in Java/Spring Boot API development before moving into data engineering, with strong CI/CD and automation using Jenkins and Git. Co-author of a peer-reviewed paper on deep-learning network intrusion detection (RNN/LSTM).

PROFESSIONAL EXPERIENCE

Accenture, Chennai, Tamil Nadu (Hybrid, Full-time)
Global professional services and technology consulting firm

Data Engineer · *Client: NetlinkTrust (NLT)* **Apr 2025 – Present**

- Designed and built nearly 20 automated reports and data pipelines from scratch on AWS — using Glue ETL jobs and Crawlers, Athena, Step Functions, Lambda, and S3 to ingest, catalog, transform, and query large datasets.
- Orchestrated end-to-end workflows with AWS Step Functions and Lambda, automating job execution and deployment through Jenkins CI/CD pipelines for reliable, repeatable delivery.
- Optimized SQL and PySpark transformations across MySQL and PostgreSQL sources, improving pipeline runtime by ~30% while processing millions of records daily; managed job code and backups with Git.
- Guided and supported clients across all business streams, delivering the full set of required reports and resolving their reporting and data queries.
- Built interactive dashboards and automated reports with Qlik Sense and Qlik NPrinting, delivering timely, actionable insights to 4+ business teams and stakeholders.

Java API Developer · *Client: Singtel DFF* **Aug 2024 – Mar 2025**

- Built and enhanced backend application functionality using Java and Spring Boot, contributing to RESTful API design and development.
- Implemented database connectivity and SQL operations against relational databases (MySQL / PostgreSQL) to support API data flows and integrations.
- Guided clients through delivered API features and project work, supporting adoption, integration, and resolution of technical queries.
- Collaborated with the team on integration, debugging, and delivery of API features within the client's platform.

INTERNSHIP

Nitroware Technologies, Coimbatore, Tamil Nadu

Final-Year Project Intern · *Research & Development* **Dec 2022 – Apr 2023**

- Developed a deep-learning intrusion detection system using recurrent neural networks (RNN) with LSTM to detect and halt network cyberattacks, achieving 99.5% detection accuracy and outperforming conventional methods.
- Handled data preprocessing, model training, and evaluation; the work was published in the peer-reviewed journal Computers, Materials & Continua (vol. 78, no. 3). doi.org/10.32604/cmc.2023.043172

PROJECTS

Grievance Redressal — Web Application · *MCA Project* **Jul 2022 – Nov 2022**

- Developed an online student complaint-management portal to record, track, route, and resolve grievances, streamlining how student requests and feedback are handled. (Tech: Java, JSP, MySQL)

CERTIFICATIONS

Programming in Java · *NPTEL (IITs / IISc initiative)* **Jul – Oct 2023**

CONTACT

SKILLS

Languages:
Python, SQL, Java

AWS & Cloud:
Glue (ETL & Crawlers), Athena, Step Functions, Lambda, S3

Data Engineering:
PySpark, ETL, Data Pipelines, Data Warehousing

Databases:
MySQL, PostgreSQL

CI/CD & Version Control:
Jenkins, Git

BI & Reporting:
Qlik Sense, Qlik NPrinting

Backend & APIs:
Spring Boot, RESTful APIs

Machine Learning:
Deep Learning, RNN, LSTM

EDUCATION

Master of Computer Applications (MCA)
Karpagam College of Engineering
Coimbatore, Tamil Nadu
2021 – 2023

Bachelor of Computer Applications (BCA)
Paavendhar College of Arts and Science
Attur, Tamil Nadu
2018 – 2021

LANGUAGES

- Tamil (Native)
- English (Fluent)
